President Carnot went to Lyons to visit the exhibition of arts, sciences and industries. He left the chamber of commerce banquet, given in his honor, shortly after 9 o'clock, and walked to his carriage, which was waiting in the Pace De La Bourse. He had hardly taken his seat when Santo, with a newspaper in his hand, pressed through the crowd and sprang ed under the foundation stone. Maupon the carriage step. President Carnot started slightly. The news spread swiftly to every part of the city. Infuriated crowds filled the streets. Before 10 o'clock an Italian restaurant had been sacked and the police were obliged to strain every nerve to protect the Italian con-

He sank gradually but steadily until 12:45 o'clock this morning, when he died. Mme. Carnot and her two sons left Paris at 11:57 o'clock last evening by special train for Lyons.

Immediately after the president was stabled, the horses attached to his carriage were started at a gallop for the prefecture. The president lay limp in the carriage. His eyes were c'osed and he was apparantly lifeless. His clothes had been loosened so that but the mule held back, when in trythe red sasah of the legion of honor was displayed. On his left side near the waist, a wet red spot told the whole story of his wound. He was lifted with the greatest care from the carriage and was carried to his room on the first floor. There he was laid on the bed on which he slept the night before and Dr. Gailleton, the mayor of the city, examined the wound.

The young assassin's full name was given by him at the police station as Cesare Giovanni Santo. He is nearly 22 years old, has a very small mus tache and wore a light brown suit with a peaked cap of the same color. On his way to the station he held his head down and glanced continually right and left, as if looking for some possible means of escape. Upon being interrogated he gave his name, but professed to know too little of the language to say much more. His inability to speak much French is rather peculiar, as he has lived in Cotte for the past six months and believed to have been considerably to the baseball teams. tobger in the country. It Is Called the Devil's Looking Glass and Dazzles the Eyes.

"One of the most peculiar of stone formations is the 'devil's looking glass,' on the Nolochuchy river," said a traveler to a reporter. "It is a palisade which rises abruptly from the river to a height of about 200 feet. It is perfectly smooth and about 100 feet wide. When the sun is at a certain stage it throws a shadow over the water and reflects the sunbeams as a mirror would, dazzling the eyes of the beholder, sometimes almost blinding him with its brightness. "To go upon the river in a skiff and

It is this which gave the name to the formation, and there are several interesting legends connected with it. some of which are devotedly believed by the mountaineers. One of these which is generally given credence is that every night at midnight, when the moon shines, the devil goes there to bathe and make up his toilet, using the reck, with the reflection of the moonlight, as a looking glass."
